The theory of separate nationalities is ust now the great question all over the world. Aggressions upon it and defenses of it form the gist of every struggle. The revolutionary spirit of 1848 seems to have pervaded ail pcoples, wherever situated. No nation has cscaped it. Even in Japan, the Tycoon is at war with the Danilas or Governors of the States of the Empire to enforce his authority. The Mexican question may be said to be an effort to preserve the nationality of Mexico, though the parallel is less striking here than in other cases. Poland is struggling for a distinct nationality, just as Russia is opposing the secession, and eudcavoring to preserve the integrity of the empire. Garrihaldi locks with | HEADQUARTERS D. RT'NT OF THE OHIO, } eager eyes to Venice and Rome, with the hope of uniting in one kingdom the whole people of Italy, and Denmark is mustering her armies to prevent the seeession of Schleswig and Holstein. In most of these cases the people of the insurgent territory being of the same ernment on the other aiming to preserve the ancient benndaries of the kingdom or em-

culiarity. The people are of the same racethe Anglo-Norman-from the lake to the guif, yet part of them, instead of aiming, as in the ease of Italy and the seceding States of Schleswig and Hoistein, to unite with people ity, not over a foreign people, but over citizens whose origin is common with those in other parts of the country.

As an indication of the influence of this spirit favoring separate nationalities, it may e noticed that the seceded States, both abroad and at home, are radically different in important particulars from those in the Northern States. Whatever difference there may be from climate and institutions, it may be suggested that it is scarcely as distinct as that in different shires in England, and by no means to compare with the marked difference in manners, habits and religion between the inhabitants of the three islands forming Great Britain proper.

Viewing the prosperous career of that counthe above celebrated CLOTHES WRINGER for Kentry, we can hardly feel that the slight differtucky and part of the State of Indiana. We are satisfied that it is the most simple, efficient and durable maence between the residents of the North and South in our Union could justify a revolution line made. Tens of thousands of these machines have on the ground of incompatibility. Still the plea was a natural one, with just

> Two communications have appeared in the Louisville Journal in reply to a letter we we could see such a peace. published from Logan county, about an assessment to pay a Mr. Ibali for damages done by robbers who burued his house. We don't know the facts personally, and, therefore, say nothing about them, and we are not at all enlightened by these communications. Mr. Hall suffered the loss of his property, and might have jost his iife; but by whom? These correspondents do not know. They suspect all who do not feel as they do of complicity in the matter; and upon that enspicion, without proof, they justify a levy on them to pay damges. No defeuse can be made for these who engage in these raids, or who aid and ahet them in any way: but there are some principles too piain to be argued, and that is, that a nan is not to be deprived of his property without due process of law; that he must be proved gnilty before he is punished. The idea of penaities without proof of guilt is revolting. It may be palatahie to a majority, but they will see the iniquity of it whenever the tahics

It may be true, and no doubt is, that some take the cath and violate it; but if men are io will thus commit perjury, then it is hardly for removal of spirits: worth while to fight for a Government at ali. These communications throw no light at all on the point. How do they know but the men whose preparty is taken have just as much a horrence of these raids as the writers themselves? How do they know that the robbery was not the work of robbers that have nothing at ali to do with politica?

How are men, who are not protected by the iaws of the State iu their persous and properly, to be expected to support the Government? Are they hound to support what gives them no protection? Our opinion is, that those who insist on ohedlence to laws and Constitutions should set the example themselves. It may be inconvenient, and sometimes distastefui, but if higher laws are to prevail, one man's higher law is as good as comply strictly with law, and then they can | Whig says it is formed of solid, clear, hlue ice, demand it of others.

By our yesterday's dispatches it is to be eeu that it is determined hereafter to re-cs tablish the freedom of trade in this State. By gratulation to onr people. Although the relaxed, yet still there has been sufficient to lm. place. pede, in some degree, the perfect freedom without which trade cannot be prosperonsly

and fairly carried ou. As to any fears that may have been entertained or nrgcd by interested parties that this is premature, they are not worth consideration. As far as the possibility of any advantage to public enemies to be derived from the Seven Ages of Man, as filled with "strange freedom of trade in this State is concerned, oaths.' the restriction might have been lifted a year ago. We trust, as is contemplated, that the same policy will be adopted along the Ohio and Mississippi. The merchant may, by ench means, do as much to restore the Union as the army.

Copy of Letter Received from Lieut. Gen. J. Longstreet, at Headquarters Department of the Ohio, and Reply of Maj.-Gen. J. G. Foster, Commanding Department of the Ohio, Knoxville, Tennessee.

Heado'rs Confederate Forces, East Tennessee, Jan. 3, 1864. To the Commanding General U.S. Forces, East

Tennessee:
Sin: I find the Proclamation of President
Lincoln, of the 8th of December last, in circulation in handbills among our soldlers. The
immediate object of this circulation appears to he to induce our soldiers to quit our ranks and to take the outh of allegiance to the

United State Government. I presume, however, that the great object and end in view is to hasten the day of peace.

I respectfully suggest for your consideration the propriety of communicating any views that your Government may have upon this subject through me, rather than by hard-bills circulated among our soliders. The few bills circulated among our soldiers. The few men who may desert under the promise held out in the Proclamation can not he men of character or standing. If they desert their ause they degrade themseives in the eyes of Hod and or man. They can do your cause no good, nor can they lojnre ours. As a great nation, you can accept none but an honorable peace; as a noble people, you could have us accept nothing less. I submit, therefore, whether the mode that I suggest

would not be more likely to lead to an honor able end than such a circulation of a partial promise of freedom. I am, sir, very respectfully,

Sir: I have the honor to acknowledge the receipt of your letter dated Jan. 3 1864. You are correct in the supposition that the great object in view in the circulation of the Presirace, arc on one side, and wish to establish a nation consisting of them clone; and the gov-their arms, and return to their allegiance as itizens of the United States, thus securing the rennion of States now trrayed in hostility against one another and restoration of peace. The immediate effect of the circulation may be to cause many men to leave your ranks to return home or come within our lines; and, in view of this latter course, it has been thought proper to issue an order announcing the favorable terms on which deserters will be re-

I accept, however, your suggestion, that it Schleswig and Holstein, to unite with people speaking the same tongue, are endeavering to separate from them. So, also, the Government here differs from the course in other instances, since it is endervoring to enforce its authority, not over a foreign people, but over citi-

men.
I have the honor to be, General,
Very respectfully,

There is one sentence worthy of notice ju Gen. Longstreet's letter, worthy of some consideration. He says: "As a great nation you, explcit" which occurred on the 30th nitimo can accept none but au honorable peace; as a noble people you could have us accept nothing less." It is upon just such a basis as this, having duc regard for the honor of each section, that a permanent Union cau be re-established. It is not only the henor of the belligerents, however, which should guide us, but the interest, the welfare of both sections If we are to live in dnrahle union with them it must be in peace, and it can never be in peace if they have constantly before their eyes that they are oppressed and deprived of rights claimed and conceded as inalienable to the

THE CHARLESTON SUFFERERS. The Yorkville (Sonth Carolina) Enquirer of the 6th ultimo has the following article in reference to the suffering condition of the people still remaining in the city of Charles-

We would call the attention of our people to the notice of Mr. Robson, in to-day's pa-per, and hope it will meet with a prompt response. Surely, we can spare a little of what we have in support of our old city, in this, ber hour of trial Mr. Robson informs us that the distress there is great-some ten thousand women and children being dependent on his exertions to supply them with food. These women are not living in idleness, but are engaged in the arsenal, ordnauce and quartermaster's departments, and other avocations, all trying to do what they can to aid our canse, and, at the same time earn a support for them. at the same time, earn a support for them-selves; but the high price and great scarcity of provisions puts it out of their power to do so, and the object of Mr. Rohson's mission is to try and help them by procuring and sending to the city those supplies which would not otherwise reach them. The city has appointed a special committee, and no family is allowed to draw supplies hefore showing that they are in need of them. Mr. Robson informs us that he has met with great kindness on his mission, and, although he has full power to impress, he has not used it in a single instance, believing that the people would more cordially respond to the call when left to their own feelings of patrictism and he is happy to say this has been the caseucarly every one to remain he has appealed sparing semething. The Richmond Whig of January 15th says Some of our Southern papers are apprehen sive of an attack on Savannah as a part of the cuemy's programme on the coast during the winter. This is inferred from certain recent movements at Hilton Head, which seem to indicate a concentration of forces for that purose. Others are of oplnion that the movements on which the apprehension is based are designed as a felut, and it a blow is intended it will be delivered elsewhere. The most plansible reason in favor of an attack on Savannah is, that it would constitute a base of operations against Charleston.

Correspondence from Honoluin informs us that the past year has been very favorable for the crops, which are larger than ever hefore. Twenty-fonr sugar mills are now in operation on those islands, uine of which are worked by steam. In addition to the plantations already worked, there are largo tracts of land equal in extent and richness of soil to any now planted, which will at no distant day be converted to this use. There are also numberless smail tracts of arable land, as well as of rich but rocky soil, upon which crops of from twenty to fifty tuns of cane could be raised. Hitherto it has been considered impracticable scaic; but a change promises to take place in duced by which it is possible to evaporate juice rapidly in small quantities. "We wish to avoid everything calculated to irritate France or to wound the just pride and proper sensibilities of that apirited nation, and thus to free our claim to her forbearace, in our present political energy from any

in our present political emergency, from any cloud of passion or prejudice. Pursning this course, the President hopes that the prejudg-ment of the Emperor against the stability of the Uriou may the sooner give way to con-victions which will modify his course and bring him back again to the traditional friend-ship which he found existing between this country and his own when, in obedience to her voice, he assumed the reins of empire. These desires and purposes do not imply either a fear of French hostility or any neglect of a prudent posture of national self-re-

liance.

"The subject upon which I propose to remark in the second place, is the relation of Fuence lower! Mexico The United States hold, in regard to Mexico, the same principles that they hold in regard to all other untious. They have neither a right uor a disposition to interveue by force in the internal affairs of Mexico, whether to establish and maintain a reo, whether to establish and maintain a republic or even a domestic Government there or to overthrow an Imperial or a foreign one if Mexico chooses to establish or accept it. The United States have neither the right uo disposition to intervene by force on either side in the immentable war which is going on between France and Mexico. On the contrary they practice in regard to Mexico, in every phase of that war, the non-intervention which they require all foreign powers to observe in regard to the United States. But, notwith-standing this self-restraint, this Government knows full well that the Inhereut normal pinion of Mexico favors a Government there republican in form and domestic in its organization, in preference to any monarchical nstitutions to be imposed from abroad. This Government knows, also, that this normal opinion of the people of Mexico resulted largely from the influence of popular opinon in this country, and is continually invigo-

ated hy it.
"The President believes, moreover, that the popular opinion of the United States is just in itself, and eminently essential to the pro-gress of civilization on the American contiuent, which civilization, it belleves, can, and will, if left free from Enropean resistance, work harmonionsly together with advancing refinements on the other continents. This Government believes that foreign resistance or attempts to control American civilization must and will fail before the ceaseless and ever-increasing activity of material, moral and States deny that he republican inetitations and political force which peculiarly belong to the American continent. Nor do the United States deny that he their opinion their own safety and the cheerful destiny to which they aspire are ultimately dependent on the continuance of free republican inetitutions throughout America. They have submitted throughout America. They have submitted these opinions to the Emperor of Franco on proper occasions as worthy of his serious con-sideration in determining how he would conduct and close what might prove a successful war in Mexico.

"Nor is it necessary to practice reserve npon the point. What if France should, upon due consideration, determine to adopt a policy in Mexico adverse to the American opinions and sentiments which I have described; that policy would probably scatter seeds which would be fruitful of jealousjes, which might nitimately ripeu into collision between France and the fruitful of jealousies, which images and the United States and other American Republics.

Au illustration of this danger has occurred already. Growers at Columbns, Ohio, on the 5th and 6th nit., was well attended. The discussions seem to have been chiefly limited to three questions—how best to protect sheep from dogs? Is washing sheep advantageon? Is the tariff on foreign wool adequate protection to the American producers? Mr. Monigomery stated that the loss to sheen-context from dogs in the State Monigomery stated that the loss to sheep-owners from dogs in the State of Obio amounted to \$200,000 per year. Lientenant Governor Stanton made an address upon the tariff, claiming that it was not sufficient to protect the great and growing interest of sheep husbandry. Colonel Daniel Needham, of Vermont, who was the commissioner from Ver-mont, to the International Exhibition of Sheep at Hamburg, delivered an address upon Sheep at Hamburg, delivered an address upon the "Triumph of the Vermont Sheep at the International Exhibition." In the course of his remarks he said: "To George Campbell, of Vermont, belongs all the honor that attended the success of the American Merinos." He took tweive little sheep—six hncks and six ewes—and surprised all Europe with the fact that America contained better Merinos than all the world beside; and not only did he surprise Europe, had America also, which never before had dared to claim for hereif the leading position in the production self the leading position in the production of stock-breeding Merinos. These sheep were of Mr. Campbell's own hreeding; and the fact that they took from the best flocks of Germany and France the two first premiums, is an honor of which America may well be rond. He closed his address with a comparison of our country with the European countries which he visited, saying that, with civil war on our hands, we were vastly hetter of than the aristocratic governments of the Old World. Mr. Henry S. Randall, L.L. D., of New York, editor of Sheep Husbandry, the Practical Shepherd, &c., also addressed the assemblage. He argued that the sheep interest of the country was on the increase and likely to be although wool and sheep. and likely to be, although wool and sheep would in the future have the depressions that they had suffered to the past. He also argued that the cotton culinre of the country, after the rebeilion, would be of more about interest than ever before; that cotton culture was a healthy occupation, and might be engaged in hy white as well as black labor. This peech, which abounds in facts and figures of importance to the general public, is to be rinted for circulation. The Couvention adourned on the 6th sine die.

Catholies in China.

The following statistics give some evidence of their number. They are taken from Protestant writers: In 1805, and after a period of forty years, during which Catholic missionaries were actually excluded from the empire, Sir George Stannton, in a note to his Laws of China (p. 175), estimated the Christians of the Chinese growness—Catholics of course, as no Protestant missionary had as yet entered the Protestant missionary had as vet entered the country—at 200,000. In 1840 Commodore Read reported, in his "Around the World" (vri. 3, p. 230) that "there are not less than 583,000 Catholic converts at this time." In 1830 there were 530,000 Catholics in Cechin China aione, besides 40,000 in the city of Pekin, 80,000 in the diocese of Naukin, 100,and so injustifiable in themselves; but he knows also that such suspicious will be entertained more or less extensively by this country and magnified in other countries equally unfriendly to France and Americs; and he knows also that it is out of such suspicious that the countries and the substitution of iaries, and whole families were united in the

THE CHEMISTRY OF MEDICINE -Among the

special delights which have so ricely repaid our visit to New England was jithe inspection it was our privilege to make of Dr. J. C. Ayer & Co.'s Laboratory, at Lowell. Although we knew by hear say that jit was large, yet we were surprised when we came into view of its real magnitude, and still more by the extent and complication, its trail improves extent and complication of its truly immerse business. The whole massive staucture is in fact one vast chemical laboratory, in which the processes of this wonderful art are consubstance exist in some one or more of its component parts of oplum are due to selely to the morphia it contains, although this is but one-eighteenth part of its weigh; the other seventeen parts are gum, extractive and inert or offensive matter. Dr. Ayer's system separates the medical properties of each substance comployed, and we are here shown the processes by which the virtues of each remedial agent are chased through the alembics until they come out completely pure at last. These concentrated, purified medical properties, or virtues, are finally combined together to produce the remedies which have made themselves a reputation for unrivaled excellence all over the world. Not only does the Doctor disclaim all secresy in his art and explain every process and every particular, but he maintains that this is the only process by which the people can be supplied with the best possible remedies for the treatment of disease. The formula by which his remedies are made are published in the medical jour nals, and have been presented to a large part of the medical faculty of the United States,

and are constantly sent by mail to such phy-sicians as apoly for them.

stitute a bright page in the record of the past; their m-morles can never fade from the remembrance of the grateful.

The d-ceased was a man of the strictest probly. High-souled honor stood firth conspicuous among the many qualiti s that adorned his character. Alwa s urbane and polite, he was, in the nohlest sense of the word, a chivairous grutheum of the olden school.

But it were useless to add more. Those who knew hin loogest and best will say that his protructed and unsuilled life is its own best culogy, compared with which words are but a feelle tribute.

His death was a fit exemplification of his life—calm and serone. Not a struggle or great disturbed his dying hour. Peac-fully he oreathed his last.

Recruiting Very Brisk in Tennessee.

[SUNDAY NIGHT'S DISPATCHES.] WASHINGTON, February 1.

It is ordered that a draft for 500,000 men. to serve for three years or during the war, be made on the 10th day of March next, for the military service of the United States, crediting and deducting therefrom as many as may have heen enlisted or drafted into the service prior to the first day of March, and not heretofore

ABRAHAM LINCOLN. [Signed] HEADQUARTERS DEPART'NT WESTERN VA., }

January 30. \
This morning a reconnoitening force that had been sent out from Colonel Campbell's command returned after having gone to Rom-ney. There they divided into three columns, one going out on the Winchester road thirty miles, the second down the Grassy Lake road to within twenty miles of Hardinsville, and the third on the old Morefield road. None of the columns met with serious opposition on the advance. Information which they brought proves to be of the highest importance, and telis of mysterions movements, proceedings, and preparations within the rebel lines. We took Capt. D. T. Tender, of Company A. and seven Georgia prisoners. The rebel officer says some five or six Georgia and Alabama regiments have been divided into small squade regiments have been divided into small squass and statioued at diff rent points in the valleys and mountains to prevent desertions. He reports that his company encountered a portion of Colonel Muligan's troops, had a fight, was whipped, and had to skedaddie. This rebei officer also reports that the enemy is actively a heavy rain has been falling all day, with pressing all man into acrylica heaven the pressing all men into service between the ages of sixteen and fifty-five. From his story, it seems that some of the North Carolina and a few of the Virginia regiments are being looked upon and watched with suspicion. The latest news from Kanawha valley reports all onlet and safe. An order has been issued, directing that

new hospital arrangements shall be made for the field, and all sick now in the army be sent to the rear.

Everything is quiet to-day in the lines and in all parts of the army.

FORTRESS MONROE, January 30. The Richmond Enquirer of the 29th contairs the following: Charleston, January 28.—Five shells were

fired at the city last night. Five shots were also fired from Sumter, all of which struck. The enemy are still at work on the battery at Cumming's Point, and hauling ammunition to Gregg and Cumming's Point batteries. There was no change in the position of the fleet on the 26 h lnst. On the 24th several shots were

the Brooklyn navy-yard, where they were placed on board the receiving ship North Carolina. The command of Col. Thorburn, which comprised the garrison at Petersburg, are now all safe. Late last night he evacuated his position in consequence of receiving information that the enemy in large force would attack Petersburg this morning with artillery. They made regular approaches, and finally charged, but found no opposing force. Col. Thorburn was not in hearing with his retreating column. Military affairs are now encouraging. HUNTSVILLE, ALA, Jan. 31.

I have just arrived here from Chattanoogs. Before leaving, General Palmer had returned from a reconnoissance to Ringgold and Dalton. The main force of the enemy had undoubtedly left.—Gen. Palmer thought toward Longstreet.—with the purpose of invading Kentney.

Since arriving here I have obtained informa-tion which satisfies me that Hardee has re-enforced Mobile. An attack was, undoubtedly, made on Mobile within five days past. Persons here have solicited permission to go through the lines to attend to their relations wounded at Mobile. Positive information may be soon expected of an attack on that place and its probable fail. New York, January 31.

The Herald's New Orleans disputch of Jannary 27 says: Previous to Admiral Farragut's arrival in this city, it was reported that he arrived off Mobile with the intention of commencing an attack there, and that the garrison and one of the forts at the entrance of Mobile harbor had mutinied, and a force sent by the authorities to quell the disturbance, and the mutineers opened upon them with the guns of the fort, driving them back with great claughter. This rumor probably arose from the fact that there is considerable dis-atisaction amount the trace grant the trace of the fort.

fact that there is considerable dis-atisfaction among the troops garrisoning Forus Morgan and Gaines, and that many of the soldiers had deserted and joined our fleet off the entrance to the harbor.

These deserters also reported a regiment of cavely, six handred strong, stationed a short distance in the rear of Mobile, who absolutely refused to serve any longer. We also learn that many of the citizens of Fiorida are enlicing in the Union army, and two regiments are already forming of white refugees.

A considerable force has been sent across Lake Poutchartrain for purposes not yet made Lake Pontchartrain for purposes not yet made

This man also states that a large force of the enemy had come down the bayous, and that four regiments were concealed in the woods. Their intention was first to attack Liquorville, where a portion of our troops were known to be, and to move on our main force at Bayou Benff. The night following three of our men, while returning to their camp, were taken prisoners, and have not been heard from since.

Hon. Wm. Whiting, Solicitor of the War Department, has decided that aliens, subjects of a foreign government, having voluntarily

enlisted in the clinical states are not entitled to be discharged from such service by reason of allenage, but may, under the law of nations, be held to perform their engagements without giving the government to which their allegi

ance is due just cause for complaint.
Secretary Stanton, before the Hale Investisting Committee yesterday, said, among
other things, that Senator Hale asked nothing other things, that Senator Hale asked nothing of him, in relation to the release of Hunt from the Oid Capitoi, which a connseilor at-law might not, with perfect propriety, have asked of a judge, and that he yielded nothing to the application of Mr. Hale that he would not have yielded to any respectable connseilor.

From information recently received by the Navy Department, it appears very few of the obstructions at Charleston have been washed away. About 300 feet of the obstructions floated down at one time, and all that has drifted afloat was rafts built by the rebels for the purpose of crippling our vessels.

WASHINGTON, Jan. 31.

It will be recollected that in October a call for 300,000 men was made. This number has been abent half filled by volunteering and reenlistments. The call now made for 500,000 is interpreted by gentlemen acquainted with military affairs to include the above 300 000, being in effect an additional call for 200,000. The volunteering is snipposed to furnish at present an average of 2,000 per day.

The order of the President makes a credit of a deduction of so many as may have enlisted or been drafted prior to March 1st, at which time the \$400 premium expites. When these arrangements are completed our army will number about 1,500,000.

TO PATIENTS,—We devote our entire time to the treatment of all the above diseases, by the most improved methods, as practiced in the best French. English and American flospitals. Our Dispensary is the only institution of the kind in America which has been established by a special charter, and this fact should give it a preference over the various quacks of doubtful character to be found in all large cities.

PATIENTS AT A DISTANCE—By sending a brief statement of their symptoms, will receive a Blank Chark, containing a list of questions, our terms for the course of treatment. 4c.
